A

CAV r, C = 1 (Fig 6 axis)

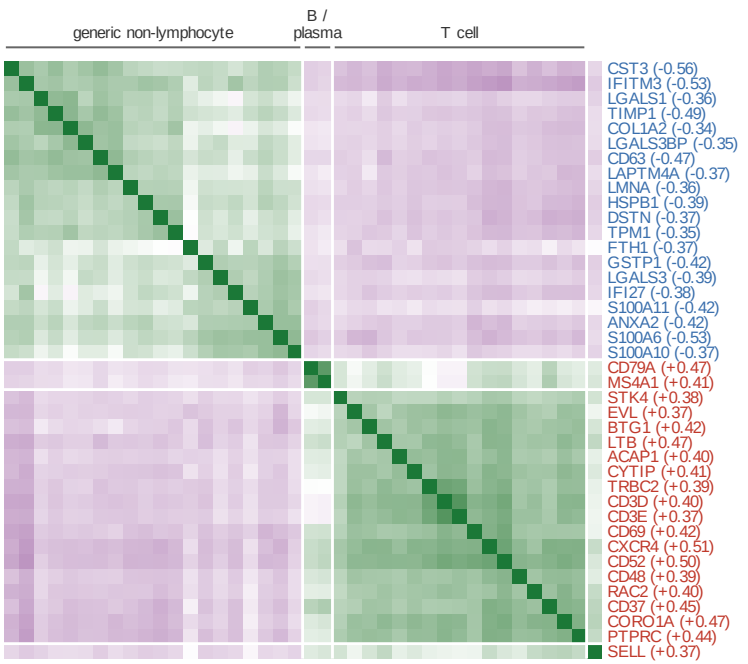

B

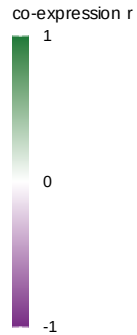

Pseudobulk DE, ranked by Wald statistic

C

CAV r, C = 10^{-4}

Top/bottom 20 genes by each ranking, clustered by co-expression across 2,000 paired-donor colorectal fibroblasts.
Labels: A, C gene (CAV r); B gene (log2FC; CAV r, C = 1).
Red = up in cancer, blue = down. A and C: shared scaler, PCA-128, converged; they differ only in C.
